TECNICAL UPDATE: introduction of new motors IE3

Technical and commercial bulletin

N. 01/17 – 01/03/2017

We hereby inform you that starting from the 1st January 2017, following the application of the European Commission Regulation no 640/2009 dated 22/07/2009, all motors with power ratings from 0,75 to 375 kW must have class IE3 efficiency level.

Euro Cold Srl adapts to the regulation above-mentioned and will proceed with a technical update of its standard and customized products affected by the legislation.

All customers will be previously informed about any changes.

Please kindly take note of this news and feel free to contact our technical or sales department for any clarification.
